

Making Lives Better

Through the Highest Standards
of Pest Management

About Us

PestBusters traces its roots back to 1991 as one of Singapore's pioneers of quality pest control. The company has since grown into a leading provider of commercial and residential pest control, termite control, and mosquito control services throughout Singapore and Malaysia. PestBusters is highly focused on sustainable integrated pest management solutions and offers a higher level of service quality to its clients. It is the sole distributor of innovative anti-termite technologies which include Termsteel and Sentricon solutions in Singapore.

ASEAN Coverage

PestBusters is part of **ENTECH Global Solutions**, a private equity backed Singapore based company that owns, operates and invests in commercial and residential pest control industry leaders in Southeast Asia. The company has two flagship brands: PestBusters out of Singapore and Malaysia, and ENTECH out of the Philippines.

ENTECH GLOBAL SOLUTIONS

Singapore

PestBusters Singapore, founded in 1991, pioneered high-quality pest control in the region. We provide comprehensive integrated pest management services for residential, commercial, and industrial properties, with expertise in termite and mosquito control. We are the sole distributor of innovative anti-termite technologies which include Termsteel and Sentricon solutions in Singapore.

Malaysia

PestBusters Malaysia was established in 2014 offering a range of integrated pest management services, including general pest control, termite control, bird control, and more to residential, commercial, and industrial clients. Our expertise and reliable service make it an ideal pest control partner for any organization regardless of size or industry.

Philippines

ENTECH Philippines offers a holistic care system consisting of integrated pest management, professional cleaning, and environmental solutions to effectively solve clients' long-term challenges to protect people, property and environment through its excellence & professionalism.

Our Services

We offer effective and efficient wide range of pest control services to residential, commercial, hospitality, food and beverage, and industrial clients throughout Singapore.

General Pest Management

Cockroach Solution

- Thorough inspection for critical areas and gaps
- Application of chemicals that comply with all international food safety and hygiene standards
- Setting up of traps in problem areas

Mosquito Solution

- Search and destroy operation
- Identification of breeding source and removal of potential habitats
- Misting treatment to eliminate adult mosquito populations

Rodent Solution

- Location of breeding grounds
- Rodent baiting and trapping
- Pest proofing recommendations to prevent future infestations

Ant Solution

- Location of entry points
- Ant baiting indoors
- Responsible spraying of chemicals on nests outdoors

Flies Solution

- Identification of unsanitary areas that serve as breeding grounds
- Combines chemical and non-chemical methods
- Recommendations on proper insect light trap location

Termite Management

Termite Solution

•Pre-construction Termite Treatment

-Installation of TermSteel around the slab penetrations, construction joints, and building perimeters to establish a long lasting poison-free anti-termite system before the completion of building

•Post-construction Termite Treatment

-Elimination of termite colony using The Sentricon® AlwaysActive™, a scientifically designed termite treatment for existing structures

Bed Bug Solution

Bed Bug Solution

- Thorough inspection for signs and activity of bed bugs
- Provides a targeted product application against bed bugs
- Application of spot treatment in infected areas

Disinfection

Disinfection

- Eliminates 99.99% of hazardous virus through a fast-acting surface disinfection

⚡ Technology & Innovations ⚙️

Cutting-Edge Pest Control in Singapore

Sustainable Vehicle Fleet

We are committed to reducing our carbon footprint by incorporating eco-friendly electric vehicles while still ensuring efficient pest control services.

Battery-Operated Eco-Friendly Equipment

We utilise a highly effective and eco-friendly pest control mist blower that provides optimal results while minimizing environmental impact.

Solar-Powered Mosquito Traps

We use the sustainable and eco-friendly mosquito trap, a non-chemical method to control mosquito populations.

Awards & Certifications

We take pride in our commitment to excellence, and we have earned a number of prestigious awards and certifications that attest to our high standards. We are a proud recipient of the Singapore Quality Class, which recognizes companies for their business excellence and continuous improvement. In addition, we have obtained ISO certifications for our quality management system, as well as BizSafe Star certification for our commitment to workplace safety and health. Our technicians are also certified by ServSafe, the industry's leading food safety training and certification program. Lastly, we use a Singapore Green Building Product for anti-termite treatment, reflecting our use of environmentally friendly pest control solutions..

A modern hotel lobby with a reception desk on the left, large cylindrical pillars on the right, and a seating area in the center. The ceiling features recessed lighting and circular light fixtures. The walls are made of large stone tiles and wood paneling. The floor is highly reflective.

Hospitality

Hotels & Resorts

PestBusters offers prime and customized solutions that are tailored to the specific needs of hotels and resorts to maintain a pest-free environment that is safe and welcoming to their guests. PestBusters is Singapore Quality Class certified company possessing world-class management and practices.

Hospitality (Hotels & Resorts)

Common Pests:

Cockroaches

Bed Bugs

Rodents

Flies

Ants

When running a hotel or resort, it's essential that you provide your guests with the best possible experience. Unfortunately, pests can put obstacles in the way of that goal – their presence in the hospitality industry can lead to negative reviews, damage to property and equipment, and even health hazards for guests and staff.

Having a pest control provider in the hospitality industry can provide a range of benefits for businesses:

- **Early detection and prevention of pest problems:**

PestBusters can help businesses to detect and prevent pest problems before they become a major issue. Regular inspections and treatments can help to identify and address pest infestations quickly, preventing them from spreading and causing damage.

- **Improved health and safety:**

PestBusters can help eliminate the health and safety risks associated with pest infestations, reducing the likelihood of illness and injury to employees and guests.

- **Compliance with regulations:**

In the hospitality industry, there are often strict regulations and guidelines governing pest control. PestBusters can help businesses comply with these regulations, ensuring that they are operating safely.

- **Enhanced reputation and customer satisfaction:**

By ensuring that the business is clean, safe, and free of pests, PestBusters can help to enhance the business' reputation and improve customer satisfaction. This can lead to increased revenue and repeat business.

Retail & Commerce

Shopping Centers

PestBusters provides an advanced approach for the retail industry to effectively prevent pest problems and quickly resolve infestations that can impact to customers' shopping experience, business reputation, and profitability.

Retail & Commerce (Shopping Centres)

Retail facilities can be particularly prone to pest infestations, due to often open doors, storage areas and foot traffic. A pest-free environment is crucial for retail businesses, as pest sightings may result in loss of customers, sales and profits.

The retail industry requires a pest control provider to achieve several benefits:

- **Protection of products:**

Pests, such as rodents, cockroaches, and birds, can cause extensive damage to retail products. They can contaminate food items, chew through packaging, and spoil merchandise. Effective pest control measures from PestBusters help safeguard products from infestation and damage, preserving their quality and value.

- **Maintaining hygiene and cleanliness:**

Retail environments need to maintain high standards of cleanliness to attract customers and comply with health and safety regulations. Pests carry disease-causing pathogens, which can pose a significant risk to public health if they contaminate food or come into contact with customers. Regular pest control treatments with PestBusters help eliminate pests and minimize the potential for health hazards, ensuring a clean and safe shopping environment.

- **Compliance with regulations:**

The retail industry is subject to various health and safety regulations. Regular pest inspections, monitoring, and treatments help retailers meet these regulatory requirements, ensuring their operations are in accordance with local laws and public standards.

- **Ongoing monitoring and maintenance:**

Pest control is not a one-time task but an ongoing process. Retail spaces are constantly changing, with new products, storage configurations, and potential entry points for pests. PestBusters provides regular monitoring and maintenance to ensure that pest control measures remain effective over time and minimize the risk of future infestations.

Common Pests:

Rodents

Cockroaches

Flies

Birds

A photograph of a modern restaurant interior. The space features large windows on the left side, offering a view of a city street. The ceiling is high with exposed wooden beams and modern lighting fixtures, including several large, multi-tiered chandeliers with gold-colored frames and white cylindrical shades. The floor is made of light-colored wood. In the foreground and middle ground, there are several rectangular wooden tables set with white glassware, including water glasses and wine glasses. The chairs are dark wood with red upholstered seats. Large indoor plants, including a prominent palm tree in a large terracotta pot, are placed throughout the space. In the background, a bar area with shelves of bottles is visible. The overall atmosphere is bright and contemporary.

Food & Beverage

Restaurants & Manufacturing

PestBusters is dedicated to delivering high level of service quality and safe pest management to the food & beverage industry. Our team of experts is certified by ServSafe, the industry's leading food & beverage safety training certification program administered by the National Restaurant Association.

Food & Beverage (Restaurants & Manufacturing)

Common Pests:

Rodents

Flies

Cockroaches

Stored Product
Pests

Birds

Pest control is of utmost importance in the food and beverage industry to ensure the safety and quality of products. Contamination by pests can lead to health hazards, product recalls, damage to reputation, and financial losses. Implementing effective pest control measures is essential to prevent infestations and maintain a hygienic environment.

Here are some of the benefits of hiring an effective pest control provider in the food & beverage industry:

- **Ensure food safety:**

The primary benefit of pest control in the food and beverage industry is ensuring food safety. Pests such as rodents and birds can contaminate food products with their droppings, urine, hair, and pathogens they carry. PestBusters provides effective pest control measures to prevent such contamination, reducing the risk of foodborne illnesses and protecting consumer's health.

- **Upholds quality assurance:**

Pests can damage packaging, raw materials, and finished products. They can consume or spoil food, rendering it unsuitable for consumption or sale. PestBusters eliminates pests and their breeding grounds to prevent future infestation to minimize product losses and maintain product quality.

- **Compliance with regulations:**

Compliance with food safety regulations and industry standards is crucial for the food and beverage industry. Many countries have specific regulations in place to ensure proper pest control. PestBusters is implementing effective pest control measures that help businesses meet these requirements, avoiding penalties, legal issues, and potential closure of facilities.

- **Long-Term Sustainability:**

PestBusters' integrated pest management methods contribute to the long-term sustainability of the food and beverage industry. By preventing pest infestations, businesses reduce the need for chemical pesticides and minimize their environmental impact. This aligns with the growing demand for sustainable and environment-friendly practices in the food industry.

Commercial

Office & Facilities

PestBusters is a renowned company that offers services specifically tailored for commercial spaces. With expertise and experience, PestBusters provides comprehensive pest management solutions to ensure a pest-free environment in commercial settings.

Commercial (Offices & Facilities)

The influx of pests unto offices or facilities can cause serious and costly damage to your place of business. They can damage your paperworks, eat away boxes or worse affect the structure of your building. They also pose a serious threat to your health and create uncomfortable working conditions.

Here's why you have to contact a reliable pest control provider for your business:

- **Safeguard health and safety:**

Pests can carry and transmit various diseases and allergens, posing health risks to individuals. PestBusters installs a proper pest management system in commercial industry that helps ensure a healthy and safe environment for employees and customers. By controlling pests, the spread of illnesses and allergies can be minimized.

- **Protecting Property and Assets:**

Pests can cause significant and structural damage to office buildings, furniture, equipment, and stored materials. PestBusters' team of experienced experts creates an effective pest management plan to prevent infestations resulting in preserving the integrity of the office infrastructure and protecting valuable assets.

- **Preservation of Reputation:**

Maintaining a pest-free office environment demonstrates a commitment to high standards and can enhance the company's reputation, fostering trust and attracting potential clients. PestBusters has a zero tolerance for pests – we practice regular monitoring to ensure all steps of the process are completed thoroughly.

- **Compliance with regulations:**

Offices are often subject to health and safety regulations that require them to maintain a pest-free environment. Engaging with PestBusters ensures adherence to such regulations, safeguarding the business from potential consequences.

Common Pests:

Termites

Mosquitoes

Cockroaches

Rodents

Construction

Building Sites

PestBusters sets high global standards for best practices and scientifically designed termite management system solutions for pre- and post-construction. Using only safe anti-termite products and ensuring procedures have minimal impact on the environment.

Construction (Building Sites)

Common Pests:

Termites

Mosquitoes

Pests are always in search for new homes. The presence of untreated soil, woods, debris, and stagnant water makes construction sites a shelter for termites and mosquitoes. Termite colonies can develop in untreated soil and woods, they can infest a building structure and quickly cause significant damage.

Pest control is an important aspect of maintaining a safe construction site and to prevent future infestation. Here are some benefits of implementing pest control measures:

- **Prevention of property damage:**

Pests can cause significant damage to construction materials, equipment, and structures. Termites, for example, can chew through wood and weaken the structural integrity of buildings. PestBusters is the sole distributor of TermSteel in Singapore – a poison-free termite protection system that is safe and effective. TermSteel products are designed, rigorously tested and certified specifically to eliminate concealed termite ingress in buildings.

- **Protecting workers' health and safety:**

Construction sites can be a breeding ground of mosquitoes which carry diseases and pose health risks to the workers. PestBusters implements pest control measures to minimize the potential for disease transmission and create a healthier working environment.

- **Environmental considerations:**

PestBusters utilises non-toxic and effective termite treatment through Sentricon® AlwaysActive™ to eliminate active termite colonies and prevent new ones from establishing. The Sentricon® system can be used on virtually any structure to protect it against termites while ensuring its procedures and processes have minimal impact on the environment.

- **Prevent future infestation:**

PestBusters works closely with builders to develop a proactive pest management program to address pest problems and prevent future infestation and costly damage in the structure.

Healthcare

Hospitals & Clinics

PestBusters implements expertise and knowledgeable pest management in healthcare facilities that require technical approach due to highly sensitive and critical environments.

Healthcare (Hospitals & Clinics)

Patient care and hygiene are top priorities for healthcare facilities of all sizes. Unfortunately, healthcare facilities are not exempted from infestations – problems can occur when pests enter from frequently opened doors, supplies being delivered, food storage and preparation.

Patients with weakened immune systems in healthcare facilities face a greater risk of infection, so restricting their exposure to pest activity is crucial. Here's why you have to contact an effective pest control provider for healthcare facility:

- **Disease Prevention:**

Pests such as rodents, flies, mosquitoes, and cockroaches are carriers of various diseases and pathogens. By PestBusters managing these pests, healthcare facilities can reduce the risk of disease transmission among patients, visitors, and staff.

- **Maintaining Hygiene Standards:**

Pests can compromise the cleanliness and hygiene of a healthcare facility. They contaminate surfaces, food, and medical supplies with their droppings, urine, and hair, posing a threat to the overall cleanliness of the environment. PestBusters effectively eliminates pests and remove their threats in healthcare setting.

- **Protecting Patient Safety:**

Healthcare facilities have a responsibility to ensure the safety and well-being of their patients. Pests can be a nuisance, causing distress. PestBusters works with healthcare facilities to create a safe and comfortable environment, promoting a positive patient experience.

- **Reputation Management:**

A healthcare facility's reputation is crucial for attracting and retaining patients. Reports of pest infestations can quickly damage a facility's reputation and erode public trust. Regular pest control measures with PestBusters demonstrate a commitment to maintaining a clean and safe environment, enhancing the facility's reputation.

Common Pests:

Bed Bugs

Rodents

Flies

Mosquitoes

Cockroaches

Education

Schools & Universities

PestBusters has proven solutions in fully eradicating pests through the Integrated Pest Management that is designed to strike against pests and guarantee success in school and university properties.

Education (Schools & Universities)

Common Pests:

Rodents

Mosquitoes

Termites

Cockroaches

Bed Bugs

School facilities can be susceptible to pest infestations due to frequently opened doors and the large numbers of people coming in and out. Some pests can be vectors for bacteria and diseases, creating unsanitary and unhealthy conditions for people and others can cause structural damage to buildings.

Pest management in schools offers several important benefits:

- **Health and Safety:**

PestBusters' fast approach to pest management helps ensure a safe and healthy learning environment for students, teachers, and staff. Pests such as rodents, mosquitoes and cockroaches can carry diseases and pose health risks. By implementing pest control measures with PestBusters, schools can minimize the spread of illnesses and create a clean atmosphere conducive to learning.

- **Prevention of Allergies and Asthma:**

Certain pests like cockroaches, dust mites, and rodents can trigger allergies and asthma in sensitive individuals. PestBusters regularly monitors and provides pest management treatments to effectively eliminate these pests, reducing the risk of allergic reactions and respiratory issues among students and staff.

- **Structural Integrity:**

Termites can cause significant damage to school buildings, compromising their structural integrity over time. PestBusters identifies, removes colony and addresses any infestations promptly, protecting the school infrastructure from costly repairs and potential hazards.

- **Food Safety:**

Schools often provide meals and snacks to students, making it crucial to maintain high standards of food safety and hygiene. Pests can contaminate food supplies and storage areas, leading to health code violations and potential health risks. PestBusters offers sustainable solutions that prevent infestations and ensure food preparation areas remain clean and pest-free.

Residential

Homes, Service Apartments & Condominiums

PestBusters is experienced in treating residential pest problems in Singapore. Our team take rigorous measures to ensure our services is vetted to adhere to global standards.

Residential (Homes, Service Apartments & Condominiums)

When it comes to pests, what is seen with the naked eye is too often only the tip of the iceberg. If you spot a cockroach somewhere in your home, there are average of more than 30 others nearby. Termite sightings can be a signal that the structural integrity of your property may be in jeopardy. PestBusters offers its advanced tactics and know-how to completely eradicate pests in your residence.

There are several benefits to hiring a pest control provider for your home:

- **Effective pest elimination:**

PestBusters has the knowledge, experience, and tools to effectively eliminate pests from your home. By identifying the type of pests present, locating their nests or entry points, and applying appropriate treatments to eliminate them and prevent future infestation.

- **Customized treatment plans:**

PestBusters develops customized treatment plans tailored to your specific pest problems. Our experts will assess the extent of the infestation, consider the size and layout of your home, and take into account any specific concerns or preferences you may have. This personalized approach ensures that the treatment is efficient and targets the pests effectively.

- **Safety:**

Pest control involves the use of chemicals and potentially hazardous substances. Hiring PestBusters ensures that the treatments are applied safely. Our team of professionals are trained in handling and applying these chemicals correctly, minimizing risks to you, your family, pets and the environment.

- **Expert knowledge and advice:**

PestBusters is knowledgeable about pests, their behavior, and the most effective treatment methods. We offer valuable insights and advice on how to prevent future infestations, maintain a pest-free environment, and answer any questions or concerns you may have.

Common Pests:

Cockroaches

Termites

Bed Bugs

Flies

Mosquitoes

The Client Journey

PestBusters has designed a process involving a series of steps to effectively identify and eliminate infestations in a client's property. We guarantee to establish a clear understanding of the pest problem at hand, and provide steps that will be taken to address.

1

Book Appointment

Schedule a property inspection via call, email or through our website. Our support team will assist you and work around your schedule.

2

Inspection & Assessment

Our team of experts will visit your property to understand all factors by identifying the infestation and locating existing and potential pest issues.

3

Treatment plan

We will explain your pest problems and work with you to formulate a site-specific and comprehensive treatment program based on your property's needs and requirements.

4

Implementation

Activation of our treatment includes finding the source, attacking from all sides, providing long-term solutions, and monitoring that assure you peace of mind.
